Aiman Hakim

Final-year Electrical Engineering student

Shah Alam, Selangor · aiman.hakim@example.com · +60 12-000 1101

Synthetic sample CV – invented person for the SDC Hackathon 2026 demo.

Summary

Final-year BEng Electrical & Electronic Engineering student interested in power systems and clean energy. Hands-on with solar PV design and site work, comfortable with lab data and basic Python, looking for a graduate role in renewable energy.

Education

- BEng (Hons) Electrical & Electronic Engineering, Universiti Teknologi MARA (UiTM), 2022 – 2026 (expected). CGPA 3.41/4.00.
- Coursework: power systems, power system protection, power electronics, circuit design, control systems, electrical machines.
- SPM 2020: 8A, including Additional Mathematics and Physics.

Experience

- Industrial Trainee, Sinar Elektrik Sdn Bhd (electrical contractor), Klang. Jun – Aug 2025.
- Assisted wiring inspections and electrical installation checks at 3 commercial sites.
- Helped install a 40 kWp rooftop solar PV system: cable routing, string testing and commissioning checklist.
- Prepared daily site reports and as-built marked-up drawings in AutoCAD for the site supervisor.
- Followed site safety rules and attended the contractor's hazard briefing and risk assessment every morning.

Projects

- Final-year project: designed a small solar charge controller circuit (MPPT) on a PCB and tested it with a 100 W panel.
- Load flow study of a 14-bus network in MATLAB for the power systems course.
- Used basic Python (pandas) to plot and compare lab data from the solar panel tests.

Skills

- Technical: solar PV sizing, wiring, circuit design, PCB layout, AutoCAD Electrical, MATLAB, basic Python.
- Soft skills: teamwork, communication with clients and sponsors, problem solving.

Certifications

- Grid-Connected PV System Design (online short course), 2025.
- CIDB Green Card (construction site safety induction), 2025.

Languages

- Bahasa Melayu (native), English (fluent).

Activities

- Secretary, Engineering Society 2024/25. Organised a 2-day solar workshop for 60 students and handled communication with 4 sponsors.

- Volunteer, rural electrification trip to Sabah with a university club (2024).
